MILLENNIUM[®]

Siding with exclusive SMARTWALL TECHNOLOGY

CertainTeed 

Quality made certain. Satisfaction guaranteed.™

Siding: Millennium double 4" in colonial white.
Trim: Beaded SuperCorners in colonial white with colonial white inserts.

**A PROMISE OF
PERFORMANCE**

Millennium's innovative, technological features
promise beauty, performance and durability.

The Millennium Promise

Millennium will deliver BEAUTY, PERFORMANCE and DURABILITY for both new construction and remodeling jobs. Millennium offers the industry's most popular styles in a wide array of colors. And, the innovative SMARTWALL TECHNOLOGY creates flatter walls and tighter laps so walls stay straight and true.

- ◆ SMARTWALL TECHNOLOGY
Patented nail-tight flexible hem and PermaFlex™ Suspension Cables allow panels to adjust to temperature changes and lay straighter on the wall.
- ◆ "Won't Blow-Off" warranty – an industry exclusive.
- ◆ Two Classic Styles:
Double 4" clapboard
Double 4-1/2" dutchlap.
- ◆ Low-gloss, select cedar finish.
- ◆ StudNailing™ indicators every 16".
- ◆ DuraLock™ post-formed lock design.
- ◆ 14 siding colors with a wide variety of coordinating trim.
- ◆ 5/8" panel projection.
- ◆ .044" thickness.
- ◆ Virtually maintenance free, never needs painting.
- ◆ Class 1(A) fire rating.

MILLENNIUM®
Won't Blow-Off
Warranty

The Nail-Tight Flexible Hem and PermaFlex Suspension Cables are made of extremely tough and strong synthetic fibers so Millennium won't rip off the wall!

Millennium is protected by U.S. Patents 5,729,946; 5,857,303; 5,887,403; 6,000,185 and 6,134,855; other patents pending.

CASE STUDY:

Hurricane Floyd Put Millennium to the Test

In September, 1999, the winds of Hurricane Floyd roared through the Carolinas. With it went the siding and underlayment of hundreds of homes clad with ordinary siding.

Nearby, a home sided with Millennium weathered the storm. Millennium siding is ideal in high-wind areas of the country. And if it ever blows off a wall, it will be replaced.

Millennium Won't Rip Off The Wall. Period.

Exclusive SMARTWALL TECHNOLOGY Keeps Walls Tight and Straight

Millennium will adjust to the seasonal cycles of expansion and contraction – the leading cause of wavy walls. The incredibly strong, yet flexible PermaFlex™ Suspension Cables allow Millennium to adjust as the temperature changes and float over minor imperfections in the wall for a beautiful, flat appearance.

With ordinary siding, laps can open up or "fish-mouth" over time.

With SMARTWALL TECHNOLOGY, laps stay tighter because panels can move as the wall moves.

Patented Nail-Tight Flexible Hem

Nails securely to the wall.

2,800 Fusion-Welded PermaFlex™ Suspension Cables

.088" Thick for extra strength.

DuraLock™ for secure installation.

StudNailing™ Indicators Every 16"

Helps ensure accurate fastening.

PATENTED

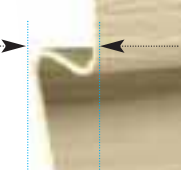

Siding that is restricted in its expansion and contraction on your walls will become wavy and stay that way. This unsightly condition is called "oilcanning."

Millennium panels with SMARTWALL TECHNOLOGY features lay straight and will allow your walls to adjust as temperature changes.

5/8" Panel Projection

For distinct shadow lines.

Siding: Millennium double 4" in oxford blue.
Trim: Beaded Supercorner with insert in snow.
Soffit: Ironmax™ Double 5" solid and fully vented in snow.

**CHANGING THE
FACE OF SIDING**

The classic look of wood, an array of color choices
and optimum performance
